

Quiz #1

for CRN 12600

October 2, 2018

Instructor: Asst. Prof. Ramazan Yeniceri

Name:

Number:

Solve the given three questions using an online C compiler. You can ask for help from any internet source, however it is strictly banned to request or receive help from your classmates. Always create at least one C code file for each question. All files must be zipped and uploaded to Ninova within the Quiz hour.

Question 1 (2.5 points):

Write a program that asks an integer from the user and prints your name if the integer is 0 and your surname if it is 1. Use **if... else** selection statement.

Question 2 (2.5 points):

Write a program that utilizes looping to print the numbers from 1 to 10 side by side on the same line with three spaces between numbers. Use **for** repetition statement.

Question 3 (2.5 points):

Write a program that asks an integer from 1 to 12 from the user and prints the corresponding month name until user enter -1 sentinel value. Use **switch** selection and **while** repetition statements.

Good luck ;)
